

**2022-2023
Course
Description
Catalog**
Kindergarten – 8th grade

***Celebrating 22 years of educational
service to our communities***

Our high schools are accredited by the North
Central Association

Dear Students and Parents,

Skyline Education has a proud 22-year tradition of offering an outstanding program of academic courses, athletic programs, and fine arts. Our mission of providing a high-quality college preparatory education that bolsters character development through academics, arts, and athletics, leads us to seek offerings that will best prepare students for life after high school. This course book provides a brief description of every course, the sequence of those courses, and policies at Skyline Education.

Skyline's academic curriculum and school culture promote:

- A **results-focused education** with a clear end in mind that begins in Kindergarten and builds to mastery of the knowledge and skills that colleges and employers' value
- **Clear and consistent goals** with an emphasis on real-world application of knowledge and skills
- **Relevant content** that increases ability to effectively use critical thinking and problem-solving skills to communicate, collaborate, and adapt to new situations in either college or in the workplace
- A sound, rigorous, **evidence-based preparation** for success in college and/or career.

Course selection plays an integral role in a student's future options. In high school, staff will support all students as they design a four-year, goal-oriented plan that will support their successes for many years to come. We want every student to be prepared for the future. This preparation begins by making informed choices regarding the classes to pursue in high school. Our academic deans are highly skilled and dedicated to helping each student reach his or her goals.

It is critical for both students and parents to be involved in the course selection process and work closely with their assigned academic dean to make the appropriate selection necessary to meet his or her goals. Please feel free to reach out to the principal, teachers, and academic deans for assistance and with any questions you may have.

Faculty and staff at Skyline Education are here to support every student to achieve their lifelong pursuits. Remember that your involvement and partnership in this process is essential for success. Join us on our journey!

Sincerely,

A handwritten signature in dark ink, appearing to read "Ronda Owens". The signature is fluid and cursive, with a large initial "R" and "O".

Ronda Owens, M. Ed.
CEO, Skyline Education, Inc.

District Mission

Our mission is to provide each student and family we serve with high quality **COLLEGE PREPARATORY** educational programs and services designed to engage the individual student's strengths and interests and foster a love of learning while developing character through academics, arts, and athletics.

Educational Philosophy

With dynamic effort and direction, all students will strive to reach their full potential and be empowered to lead successful and productive lives.

Our charter schools are founded on the premise that all students can be successful in college. For this to become reality, we must provide students with a focused, standards-based curriculum. Student mastery will be achieved through content-rich lessons that imparts core knowledge and essential learning skills.

In order to achieve academic excellence, our program will focus on character development through academics, athletics, and the arts. Combining a constant focus on character development and academic excellence, will lead our students to be prepared for the challenges that lie ahead of them in education and in life.

Course Catalog Description

This course description catalog is a comprehensive list of courses available in the Skyline School system.

Course offerings may vary from campus to campus based upon available facilities, highly qualified staff, and adequate student enrollment.

Annual Public Notification of Nondiscrimination Skyline Education does not discriminate on the basis of race, color, national origin, sex, age, or disability in admission to its programs, services, or activities, in access to them, in treatment of individuals, or in any aspect of their operations. Skyline Educations' Career and Technical Education Department does not discriminate in enrollment or access to any of the available programs. The limitation of English language skills shall not be a barrier to admission or participation in the district's activities and programs. Skyline Schools also does not discriminate in its hiring or employment practices.

This notice is provided as required by Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title IX of the Education Amendments of 1972, the Age Discrimination Act of 1975, and the Americans with Disabilities Act of 1990. Questions, complaints, or requests for additional information regarding these laws may be forwarded to the designated compliance coordinator(s):

Director of Special Education: Dawn Livesey

Directors of Athletics: Zyzick Owens, Chandler Campus; Jamarei Bryant, South Campus, and Jeremy Basham, Gila River Campus

K-8 Enrollment

Enrollment

To enroll you need to call or visit the school and complete an Enrollment packet for the desired school.

Students entering Kindergarten will need to take the Kindergarten readiness exam.

Grading

Multiple assessment structures are needed to gain an accurate picture of student readiness and mastery.

Graded tasks may include but are not limited to the following:

1. Summative Assessments
2. Alternative Assessments
3. Long term Projects
4. Labs
5. Daily Activities

Students attending Skyline Education schools will be assessed using the following grading scales.

Grading Scale	GPA
90-100 = A	A = 4.0
80-89 = B	B = 3.0
70-79 = C	C = 2.0
60-69 = D	D = 1.0
0-59 = F	F = No credit
Incomplete = I	

Students in K-2 use the standards-based grade scale.

Standards-based Grading Scale
HP – Highly Proficient
P – Proficient
PP – Partially Proficiency
MP – Minimally Proficient

Teachers and administrators can address any questions or concerns you have about the grading scale.

Testing

Testing is a State requirement.

State mandated testing (AASA) requires mandatory full-day attendance.

Students who attend regularly are given the knowledge and skills necessary to demonstrate academic excellence and the ability to do well in the college, university, or career of their choice.

These tests are designed to represent the necessary grade level knowledge and skills student need to be successful. It provides data that is analyzed to assess the needs of the students and the resources that are needed to ensure growth and academic achievement.

Students are encouraged to do their best.

Incomplete Grades

Students who receive a grade of Incomplete must complete the necessary course work within two weeks, unless they have a medical condition and documentation that justifies extending the deadline.

An Incomplete grade signifies that a portion of the required course work has not been completed and evaluated in the prescribed time period owing to unforeseen but fully

justified reasons and that there is still a possibility of earning credit.

It is the responsibility of the student to reach an agreement with the teacher on the means by which the remaining course requirements will be satisfied.

A final grade is assigned when the work agreed upon has been completed and evaluated.

When assigning a grade of Incomplete ("I"), the instructor shall:

- Complete *the Statement of Requirements for Completion of Course Work* (see Appendix D)
- Retain a signed copy for his/her records
- File a signed copy with the department for future reference
- Provide a signed copy to the student and parent.

When specific requirements are completed, the instructor will report a change of grade.

If the requirements are not met in the timeframe set by the teacher and/or a medical extension was not approved through the administration, then the grade becomes an F or no credit.

Promotion, and Retention of Students

Attendance is an important factor in a student's ability to successfully complete the course requirements and master the content.

At anytime a teacher may make a recommendation for promotion to a

higher level course or to retain a student.

Promotion from one grade to the next is based upon the ability to succeed at the next grade level.

When formulating a recommendation for retention the teacher works closely with the school's principal to ensure the recommendation is in the best interest of the student.

Parents/Gaurdians are notified of additional tutoring prior to Winter Break and again during April if necessary for a retention.

Teachers base their recommendation to promote or retain students on the following criteria:

- achievement on summative assessments
- attendance
- mastery of standards
- achievement on standardized tests
- age, maturity, and effort
- Tutoring attendance and mastery of concepts]
- Interventions

Parent(s) may request promotion passed the current grade or retention for their student by providing a written request during the school year and must be approved by the President of Skyline Education. All submissions must be complete by the close of the third quarter, for the following year. Promotions are not done after the school has started.

Final promotion/retention decision are determined by Skyline Administration and the current Principal of the School.

High School Credits earned in Middle School

Middle school students who exceed state standards on the Az Merit may take a placement exam to qualify them to earn high school credit, while in middle school.

The student would need to be enrolled into one of the district high schools and take a high school course.

These courses must be approved by the legal guardian and the administration prior to starting the class.

Course selection and placement is dependent upon the Az Merit scores, student readiness, and appropriate communication between parents, students, teachers, and building administrators.

Students could start high school with 0.5 credit for each of the high school courses, they took while still in Middle School.

These course would fulfill some of the requirements needed to obtain a high school diploma and meet the necessary requirements for admission into institutions of higher learning, however that is determined by the High School they attend. Skyline Education students will be able to transfer the credit.

Academic Honors

Students will be recognized quarterly for academic achievement based on the following criteria.

Standards Based Award criteria:

	Highly Proficient	Proficient
Math	Students earn HP status in all domains.	Students earn P (or better) in each domain.
ELA	Students earn HP status in all strands.	Students earn Proficient (or better) in each strand.

Traditional Grading Award criteria:

	Highest Honors	Honors
Math	Students earn a 3.8 or higher.	Students earn a 3.5 or higher.
ELA		
Science		
Social Studies		

Skyline Scholars

Skyline Scholar requirements are:
A cumulative grade point average of 3.80 or better without any grades lower than a "D" and without any I's on the transcripts.

Extracurricular Eligibility for Skyline Students

Eligibility

There is an activity participation fee for each interscholastic activity or sport as established in school policy.

Eligibility for participation in these extracurricular activities, a student must pass all courses with a “C” or better, the quarter prior to participation.

Students that are ineligible to participate or play, may apply for eligibility reinstatement at weekly intervals.

The student must be passing all current classes to be considered for reinstatement.

Academic Eligibility

Skyline Education's network of schools currently participate in the [CAA \(Charter Athletic Association\)](#).

Per CAA Constitution.

4.4 Eligibility of players

4.4.1. Each school must maintain and enforce an academic eligibility policy with a minimum of all passing academic grades (No F's).

4.4.1.1 If a player that is not academically eligible participates in a CAA game/contest, that game/contest is declared a forfeit.

4.4.2. Players must take no less than 51 percent of their schooling through the school's curriculum.

4.4.2.1 Students must be enrolled in 3 core curriculum classes at their school in order to be considered eligible for that school.

4.4.2.2. In a student's last year of high school, they are only required to take as many classes as necessary to complete their graduation requirements in order to be considered eligible.

4.4.3. Students transferring into a school after the official start date of a season (First official day of practice) must sit out that season unless they did not play that particular sport the year before. With the exception of students who change address or domicile to a location closer to the school the student is transferring to. This includes junior high and high school.

4.4.4. High school students cannot be 19 on or before September 1st

4.4.4.1 Limit of 4 years of High School eligibility from 9th-12th grade per sport. (2017)

4.4.4.2 Student athletes 6th grade or below may not play on varsity level teams.

4.4.4.3 Junior Varsity athletes can be in grades 7th – 11th only.

4.4.5. Junior high students cannot be 15 on or before September 1st.

4.4.6. Players must be in eighth grade or below to play junior high sports. The individual school is responsible for determining the accurate grade level of the student based on their standards.

4.4.7 The grade level of a home school student, due to the unique structure of their curriculum, shall be of no consequence and age will be the sole determining factor.

4.4.7.1 Once a student has met the State of Arizona requirements for graduation or any other states, they lose eligibility to continue to compete in the CAA, even if they still meet age requirement.

4.4.8. Once a 7th or 8th grade student has played in 3 or more regular season games with the

varsity or junior varsity team they may not return to the junior high team.

4.4.9. For all High School competitions (except football, track and cross country) a varsity or junior varsity a team is only eligible to participate in a maximum of 24 games during the season with no more than 2 tournaments excluding the state tournaments.

4.4.9.1 A game is defined as contest that 5 or more CAA athletes from one CAA team participate in together.

4.4.9.1 Junior high team is only eligible to participate in a maximum of 16 games and with no more than 1 tournament excluding the state tournament.

4.4.10 For all High School competitions in the following sports football, track and cross country a varsity or junior varsity team is only eligible to participate in a maximum of 12 games or competitions during the season excluding the state tournament.

4.4.10.1 A game or competition is defined as contest that 5 or more CAA athletes from one CAA team participate in together.

4.4.11. In accordance with title 9, women may only participate on men's teams when a corresponding sport is not offered by the member school. A co-ed team must enter the league as a men's team.

4.4.12 All student athletes must watch the NFHS Concussion video to be eligible to compete in a CAA contest/game. See website for details.

4.4.13. The league will entertain applications for hardship before each scheduling meeting but is under no obligation to accept them.

4.4.13 Hardships:

4.4.13.1 Combining of Teams – The joining together of students from two or more member schools in the same area or close proximity to form a single team shall be permitted subject to the following conditions:

4.4.13.2 Permission must be obtained from the *Disciplinary Committee* on an annual basis.

4.4.13.3 If a combined school team is approved. The team will be set into a division based on their boys and girls grades 9-11 enrollment, shall be combined for division level placement. (3A or 2A)

4.4.13.4 Home school athletes who want to compete at a member school must submit a letter stating that 51 percent of their curriculum is received from home schooling. Letter needs to be signed by parents.

4.4.13.5 Students who attend local Junior High or High school, where a particular sport is not offered and are requesting to compete for a current CAA member school must submit the CAA Hardship Form prior to the start of that particular sport season.

4.4.14. Schools failing to comply with the guidelines defined in Article 4.4 will be held accountable per the guidelines established in Article 7.

Curriculum Overview K-8th Grade

English Language Arts and Math Curriculum K-8th Grade

In K-8th grade, students will have access to Expeditionary Learning curriculum for both English Language Arts and Math. These curricula provide instructional practices on achieving 21st century literacy and supports Arizona College and Career Ready Standards (AZCCRS). It also provides additional guidance on implementation of the standards with English Language Learners (ELLs), Multilingual Learners (MLLs), and Students with Disabilities (SWDs).

Mathematics

In grades K-8, students will have access to Eureka Math, a Common Core aligned curriculum that equates mathematical concepts to stories, with the aim of developing conceptual understanding. Our curriculum encourages students to use various mental strategies to solve problems, and to focus on the process instead of the answer. Students are taught the fundamentals behind why an equation was created to support solving a problem. The curriculum is marked by in-depth focus on fewer topics. It integrates the CCLS (Common Core Learning Standards), rigorous classroom reasoning, extended classroom time devoted to practice and reflection through extensive problem sets, and high

expectations for mastery. We connect the Standards for Mathematical Practice to the Standards for Mathematical Content.

Science Curriculum K-8th Grade

In K-8th grade, students will have access to FOSS (Full Option Science System), a research-based science curriculum. The FOSS kits provide tools and strategies to engage students and teachers in enduring experiences that lead to deeper understanding of the natural world aligning to AZCCRS and Next Generation Science Standards (NGSS).

Science Curriculum 5-8th Grade (Gila River Campus only)

In 5-8th grade, students have access to Lab-Aids, a research-based core curriculum that supports AZCCRS and NGSS. Students are provided with guided and open-ended inquiry opportunities to experience the scientific process and natural phenomena.

Both FOSS and Science Lab-Aids incorporate the STEAM approach:

- Provide hands-on experiential learning
- Expose students to real world problems and approaches to solve those problems
- Set the foundation for independent and critical thinking
- Learn how to use science and engineering practices to solve problems

- Create a well-rounded and versatile thinker

Learning Resources

Learning Resources K-8th Grade

Reading A-Z

Reading A-Z is another resource available to all K-4 students. Students will have access to printable books on their independent reading level to target a multitude of reading comprehension skills, exposure to informational and fictional texts, and a variety of genres. This program can be found at: <https://www.readinga-z.com/>

Assessment Resources

Renaissance Star Reading

A comprehensive assessment that provides all the insights needed to guide literacy growth for emergent readers, struggling readers, and high achievers.

Renaissance Star Math

A comprehensive assessment that helps increase math mastery with actionable insight into each student's math skills and subskills.

Learning Resources

Renaissance Freckle

Renaissance Freckle provides differentiated practice aligned to ELA and Math standards. This digital intervention program continuously adapts for student practice in math

or ELA activities at the “just-right” level to help increase student growth and proficiency through standards-based skill development, personalized goal setting, and mastery.

**Please see your school administrator for student log in information.*

English Language Arts

Kindergarten-5th grade

Key Features of the Standards	
Reading: Text complexity and the growth of comprehension	The Reading standards place equal emphasis on the sophistication of what students read and the skill with which they read. Whatever they are reading, students must also show a steadily growing ability to discern more from and make fuller use of text, including making an increasing number of connections among ideas and between texts, considering a wider range of textual evidence, and becoming more sensitive to inconsistencies, ambiguities, and poor reasoning in texts.
Writing: Text types, responding to reading, and research	The Standards acknowledge the fact that whereas some writing skills, such as the ability to plan, revise, edit, and publish, are applicable to many types of writing; other skills are more properly defined in terms of specific writing types: arguments, informative/explanatory texts, and narratives. Standard 9 stresses the importance of the writing-reading connection by requiring students to draw upon and write about evidence from literary and informational texts. Because of the centrality of writing to most forms of inquiry, research standards are prominently included in this strand, though skills important to research are infused throughout the document
Speaking and Listening: Flexible communication and collaboration	Including but not limited to skills necessary for formal presentations, the Speaking and Listening standards require students to develop a range of broadly useful oral communication and interpersonal skills. Students must learn to work together, express and listen carefully to ideas, integrate information from oral, visual, quantitative, and media sources, evaluate what they hear, use media and visual displays strategically to help achieve communicative purposes, and adapt speech to context and task.
Language: Conventions,	The Language standards include the essential "rules" of standard written and spoken English, but they also approach language as a matter of craft and informed choice among alternatives. The vocabulary standards focus on understanding words and phrases,

effective use, and vocabulary	their relationships, and their nuances and on acquiring new vocabulary, particularly general academic and domain-specific words and phrases.
--------------------------------------	--

The Kindergarten – 5th grade standards define what students should understand and be able to do by the end of each grade. They correspond to the College and Career Readiness (CCR) anchor standards below by number. The CCR and grade-specific standards are necessary complements—the former providing broad standards and the latter providing additional specificity—that together define the skills and understandings that all students must demonstrate.

Key Ideas and Details

1. Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.
2. Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.
3. Analyze how and why individuals, events, and ideas develop and interact over the course of a text.

Craft and Structure

4. Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone.
5. Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.
6. Assess how point of view or purpose shapes the content and style of a text.

Integration of Knowledge and Ideas

7. Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.*
8. Delineate and evaluate the argument and specific claims in a text, including the validity of the reasoning as well as the relevance and sufficiency of the evidence.
9. Analyze how two or more texts address similar themes or topics in order to build knowledge or to compare the approaches the authors take.

Range of Reading and Level of Text Complexity

10. Read and comprehend complex literary and informational texts independently and proficiently.

Kindergarten

In kindergarten, students will learn the alphabet and the basic features of letters and words. They will break down spoken and written words into syllables and letters and identify the sounds each letter makes. These important skills will enable students to learn new words and to read and understand simple books and stories.

Students will also learn to write and share information in a variety of ways, including drawing, writing letters and words, listening to others, and speaking aloud.

Activities in these areas will include:

- Naming and writing upper- and lowercase letters
- Matching letters to sounds and using other methods to figure out unfamiliar words when reading and writing
- Learning and using new words,
- Identifying words that rhyme
- Reading common words such as the, of, you, are, she, and my
- Asking and answering questions about a story the teacher reads out loud
- Identifying characters, settings, and major events in a story
- Recognizing the person, place, thing, or idea that an illustration shows
- Participating in discussions by listening and taking turns speaking
- Using a combination of drawing, speaking, and writing to describe an event, give information about a topic, or share an opinion
- Taking part in shared reading, writing, and research projects
- Expressing thoughts, feelings, and ideas clearly

1st grade

In Grade 1, students will build important reading, writing, speaking, and listening skills. Students will continue to learn the letters and sounds that make up words. They will think, talk, and write about what they read in stories, articles, and other sources of information. In their writing, students will work on putting together clear sentences on a range of topics using a growing vocabulary.

Activities in these areas will include:

- Reading stories and showing they understand the lesson or moral of the story
- Examining a story, including characters, settings, and major events
- Comparing and contrasting the experiences of different characters
- Identifying the reasons an author gives to support a point

- Explaining differences between texts that tell stories and texts that provide information
- Learning and using new words
- Participating in class discussions by listening, responding to what others are saying, and asking questions
- Describing people, places, things, and events, expressing feelings and ideas clearly
- Learning basic rules of spoken and written English
- Working with others to gather facts and information on a topic
- Writing to describe an event, provide information on a topic, or share an opinion

2nd grade

In Grade 2, students will continue to build important reading, writing, speaking, and listening skills. They will think, talk, and write about what they read in variety of texts, such as stories, books, articles, and other sources of information including the Internet.

In their writing, students will learn how to develop a topic and strengthen their skills by editing and revising.

Activities in these areas will include:

- Reading stories, including fables and folktales from different cultures, and identifying the lesson or moral of the story
- Reading texts about history, social studies, or science and identifying the main idea
- Answering who, what, where, when, why, and how questions about stories and books
- Describing the reasons that an author gives to support a point
- Learning and using new words
- Learning the rules of spoken and written English
- Participating in class discussions by listening and building on what others are saying
- Describing in their own words information learned from articles or books read aloud
- Working together to gather facts and information on a topic
- Writing about a short series of events and describing actions, thoughts, and feelings
- Writing about opinions on books using important details and examples to support a position

3rd grade

In Grade 3, students will build important reading, writing, speaking, and listening skills.

They will think, talk, and write about what they read in a variety of articles, books, and other texts. In their writing, students will pay more attention to organizing information, developing ideas, and supporting these ideas with facts, details, and reasons.

Activities in these areas will include:

- Reading a wide range of stories and describing how a story teaches a lesson
- Describing characters in a story and how their actions contributed to events
- Reading texts and answering questions about what they learned
- Referring to information from illustrations such as maps or pictures as well as the words in a text to support their answers
- Learning and using new words, including words related to specific subjects (such as science words)
- Participating in class discussions by listening, asking questions, sharing ideas, and building on the ideas of others
- Giving a class presentation on a topic or telling a story using relevant facts and details and speaking clearly
- Writing stories with dialogue and descriptions of character's actions, thoughts, and feelings
- Gathering information from books, articles, and online sources to build understanding of a topic and writing research or opinion papers over extended periods of time

4th grade

In Grade 4, students will continue to build important reading, writing, speaking, and listening skills. They will read challenging literature, articles, and other sources of information and continue to grow their vocabulary. They will also be expected to clearly explain in detail what they have read by referring to details or information from the text. In writing, students will organize their ideas and develop topics with reasons, facts, and details.

Activities in these areas will include:

- Identifying the theme or main idea of a story, play, or poem
- Comparing stories from different cultures
- Explaining how an author uses facts, details, and evidence to support their points

- Reading and understanding information presented in charts, graphs, timelines, and other illustrations
- Learning and using new words, including words related to specific subjects (such as science words)
- Participating in class discussions by listening, asking questions, sharing ideas, and building on the ideas of others
- Giving a class presentation on a topic or telling a story using relevant, organized facts and details and speaking clearly
- Writing stories with dialogue and descriptions of character's actions, thoughts, and feelings
- Writing research or opinion papers over extended periods of time
- Taking notes and organizing information from books, articles, and online sources to learn more about a topic

5th grade

In Grade 5, students will continue to build important reading, writing, speaking, and listening skills. They will read more challenging literature, articles, and other sources of information and continue to grow their vocabulary. Students will also be expected to understand and clearly summarize what they have learned from readings and classroom discussions, referring to specific evidence and details from the text.

Students will write regularly and continue to develop their ability to gather, organize, interpret, and present information.

Activities in these areas will include:

- Determining the theme of a story, play, or poem, including how characters respond to challenges
- Comparing and contrasting stories that deal with similar themes or topics
- Explaining how authors use reasons and evidence to support their points or ideas
- Drawing on information from multiple books, articles, or online sources to locate an answer or to solve a problem quickly
- Learning the rules of spoken and written English
- Learning and using new words, including words related to specific subjects (such as science words)
- Understanding figurative language
- Participating in class discussions by listening, asking questions, sharing ideas, and building on the ideas of others
- Giving a class presentation on a topic or telling a story, introducing relevant facts and details in a clear, logical order
- Writing research or opinion papers over extended periods of time

Standard 9 stresses the importance of the writing-reading connection by requiring students to draw upon and write about evidence from literary and informational texts. Because of the centrality of writing to most forms of inquiry, research standards are prominently included in this strand, though skills important to research are infused throughout the document
Speaking and Listening: Flexible communication and collaboration	Including but not limited to skills necessary for formal presentations, the Speaking and Listening standards require students to develop a range of broadly useful oral communication and interpersonal skills. Students must learn to work together, express and listen carefully to ideas, integrate information from oral, visual, quantitative, and media sources, evaluate what they hear, use media and visual displays strategically to help achieve communicative purposes, and adapt speech to context and task
Language: Conventions,	The Language standards include the essential “rules” of standard written and spoken English, but they also approach language as a matter of craft and informed choice among alternatives. The vocabulary standards focus on understanding words and phrases,

effective use, and vocabulary	their relationships, and their nuances and on acquiring new vocabulary, particularly general academic and domain-specific words and phrases.
--------------------------------------	--

The 6–8 standards define what students should understand and be able to do by the end of each grade. They correspond to the College and Career Readiness (CCR) anchor standards below by number. The CCR and grade-specific standards are necessary complements—the former providing broad standards and the latter providing additional specificity—that together define the skills and understandings that all students must demonstrate.

Key Ideas and Details

1. Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.
2. Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.
3. Analyze how and why individuals, events, and ideas develop and interact over the course of a text.

Craft and Structure

4. Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone.
5. Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.
6. Assess how point of view or purpose shapes the content and style of a text.

Integration of Knowledge and Ideas

7. Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.*
8. Delineate and evaluate the argument and specific claims in a text, including the validity of the reasoning as well as the relevance and sufficiency of the evidence.
9. Analyze how two or more texts address similar themes or topics in order to build knowledge or to compare the approaches the authors take.

Range of Reading and Level of Text Complexity

10. Read and comprehend complex literary and informational texts independently and proficiently.

6th grade

In Grade 6, students will read a range of challenging books, articles, and texts, and will be expected to demonstrate their understanding of the material by answering questions and contributing to class discussions. In writing, students will continue to work on their use of language, sentence structure, and organization of ideas. They will also be expected to integrate information from different sources and respond to challenging content through written interpretation and analysis.

Activities in these areas will include:

- Providing detailed summaries of texts
- Determining the theme of a text and how it is conveyed
- Describing how a story or play unfolds and how characters respond to conflicts
- Using reading strategies to determine the meaning and context of unknown words
- Comparing and contrasting various texts
- Understanding the figurative and (implied) meaning of words and phrases
- Identifying and evaluating specific claims or arguments in a text
- Supporting written claims or arguments with clear reasons and relevant evidence
- Producing clear and coherent writing appropriate to the task, purpose, and audience
- Participating in class discussions about various texts and topics
- Conducting short research projects to answer a question, drawing on several sources

7th grade

In Grade 7, students will continue to develop the ability to cite relevant evidence when interpreting or analyzing a text or supporting their points in speaking and writing. Your child will also build academic vocabulary as he or she reads more complex texts, including stories, plays, historical novels, poems, and informational books and articles.

Activities in these areas will include:

- Analyzing how the form or structure of a play or poem contributes to its meaning
- Analyzing how particular elements of a story or play interact
- Determining how an author develops and contrasts the points of view of different characters or narrators in a text
- Conducting short research projects, drawing on several sources and identifying related questions for further research and investigation
- Engaging in a range of classroom discussions on topics and texts, expressing ideas clearly and building on the ideas of others
- Identifying a speaker's argument and specific claims and evaluating the reasoning and evidence behind these claims
- Using clues such as word roots to a word to determine the meaning of a word
- Interpreting figures of speech or references to literature or mythology in a text
- Writing for a range of purposes and audiences

8th grade

In Grade 8, students will read major works of fiction and nonfiction from all over the world and from different time periods. They will continue to learn how to understand what they read and evaluate an author's assumptions and claims. They will also conduct research that will require the analysis of resources and accurate interpretation of literary and informational text. Activities in these areas will include:

- Identifying what a reading selection explicitly says and drawing inferences based on evidence from the text
- Analyzing the impact of specific word choices on meaning and tone, including analogies or allusions to other texts
- Evaluating the argument and specific claims in a text, assessing whether the reasoning is sound, and the evidence is relevant and sufficient
- Connecting information and ideas efficiently and effectively in writing
- Analyzing the purpose of information presented in diverse media formats, such as video clips or interactive maps
- Participating in class discussions on various topics, texts, and issues by expressing ideas and building on the ideas of others
- Developing a large vocabulary of multi-use academic words and phrases
- Interpreting figures of speech, such as puns or verbal irony, in context

Mathematics

Kindergarten – 5th grade

The AZ College and Career Readiness standards call for greater focus, coherence, and rigor when teaching mathematics. Rather than racing to cover many topics in a mile-wide, inch-deep curriculum, the standards ask math teachers to significantly narrow and deepen the way time and energy are spent in the classroom.

The Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

Domain Progression

Kindergarten	1	2	3	4	5
Counting & Cardinality					
Number & Operations in Base Ten					
			Numbers & Operations - Fractions		
Operations and Algebraic Thinking					
Geometry					
Measurement and Data					

Kindergarten

In kindergarten, instructional time will focus on two critical areas: (1) representing, relating, and operating on whole numbers, initially with sets of objects; (2) describing shapes and space.

In kindergarten, your child will focus primarily on two important areas. The first is learning numbers and what numbers represent. The second is addition and subtraction. Students will also learn to identify and work with shapes.

Activities in these areas include:

- Counting how many objects are in a group and comparing the quantities of two groups of objects
- Comparing two numbers to identify which is greater or less than the other
- Understanding addition as putting together and subtraction as taking away from
- Adding and subtracting very small numbers quickly and accurately
- Breaking up numbers less than or equal to 10 in more than one way (for example, $9=6+3$, $9=5+4$)
- For any number from 1 to 9, finding the missing quantity that is needed to reach 10
- Representing addition and subtraction word problems using objects or by drawing pictures
- Solving addition and subtraction word problems involving numbers that add up to 10 or less or by subtracting from a number 10 or less

1st grade

In Grade 1, instructional time will focus on four critical areas: (1) developing understanding of addition, subtraction, and strategies for addition and subtraction within 20; (2) developing understanding of whole number relationships and place value, including grouping in tens and ones; (3) developing understanding of linear measurement and measuring lengths as expressing length units; and (4) reasoning about attributes of, and composing and decomposing geometric shapes. Students will also use charts, tables, and diagrams to solve problems.

Activities in these areas will include:

- Quickly and accurately adding and subtracting numbers together up to 10
- Understanding the rules of addition and subtraction (for example, $5+2=2+5$)
- Solving word problems that involve adding or subtracting numbers up to 20
- Understanding what the different digits mean in two-digit numbers (place value)

- Comparing two-digit numbers using the comparison symbols
- Understanding the meaning of the equal sign (=) and determining if statements involving addition and subtraction are true or false
- Measuring the lengths of objects using a shorter object as a unit of length
- Organizing objects into categories and comparing the number of objects in each
- Dividing circles and rectangles into halves and quarters

2nd grade

In Grade 2, Instructional time will focus on four critical areas: (1) extending understanding of base-ten notation; (2) building fluency with addition and subtraction; (3) using standard units of measure; and (4) describing and analyzing shapes.

Students will extend their understanding of place value to the hundreds place and use this knowledge to solve word problems, including those involving length and other units of measure. Students will continue to work on their addition and subtraction skills, quickly and accurately adding and subtracting numbers up to 100 and they will build a foundation for understanding fractions by working with shapes and geometry.

Activities in these areas will include:

- Quickly and accurately adding numbers together that total up to 20 or less or subtracting from numbers up through 20
- Solving one- or two-step word problems by adding or subtracting
- Understanding what the different digits mean in a three-digit number
- Adding and subtracting three-digit numbers
- Measuring lengths of objects in standard units such as inches and centimeters
- Solving addition and subtraction word problems involving length
- Solving problems involving money
- Breaking up a rectangle into same-size squares
- Dividing circles and rectangles into halves, thirds, or fourths
- Solving addition, subtraction, and comparison word problems using information presented in a bar graph
- Writing equations to represent addition of equal numbers

3rd grade

In Grade 3, instructional time will focus on four critical areas: (1) developing understanding of multiplication and division and strategies for multiplication and division within 100; (2) developing understanding of fractions, especially unit fractions (fractions with numerator 1); (3) developing understanding of the

structure of rectangular arrays and of area; and (4) describing and analyzing two-dimensional shapes.

Students will continue to build their concept of numbers, developing an understanding of fractions as numbers. They will learn the concepts behind multiplication and division and apply problem-solving skills and strategies for multiplying and dividing numbers up through 100 to solve word problems. Students will also make connections between the concept of the area of a rectangle and multiplication and addition of whole numbers.

Activities in these areas will include:

- Understanding and explaining what it means to multiply or divide numbers
- Multiplying all one-digit numbers from memory (knowing their times table)
- Multiplying one-digit numbers by multiples of 10 (such as 20, 30, 40)
- Solving two-step word problems using addition, subtraction, multiplication, and division
- Understanding the concept of area
- Relating the measurement of area to multiplication and division
- Understanding fractions as numbers
- Understanding and identifying a fraction as a number on a number line
- Comparing the size of two fractions
- Expressing whole numbers as fractions and identifying fractions that are equal to whole numbers (for example, recognizing that $\frac{3}{1}$ and 3 are the same number)
- Measuring weights and volumes and solving word problems involving these measurements
- Representing and interpreting data

4th grade

In Grade 4, instructional time will focus on three critical areas: (1) developing understanding and fluency with multi-digit multiplication, and developing understanding of dividing to find quotients involving multi-digit dividends; (2) developing an understanding of fraction equivalence, addition and subtraction of fractions with like denominators, and multiplication of fractions by whole numbers; (3) understanding that geometric figures can be analyzed and classified based on their properties, such as having parallel sides, perpendicular sides, particular angle measures, and symmetry.

In grade four, your child will use addition, subtraction, multiplication, and division to solve word problems, including problems involving measurement of volume, mass, and time. Students will continue to build their understanding of fractions—creating equal fractions, comparing the size of fractions, adding and subtracting fractions, and multiplying fractions by whole numbers. They will also start to understand the relationship between fractions and decimals.

Activities in these areas will include:

- Adding and subtracting whole numbers up to 1 million quickly and accurately
- Solving multi-step word problems, including problems involving measurement and converting measurements from larger to smaller units
- Multiplying and dividing multi-digit numbers
- Extending understanding of fractions by comparing the size of two fractions
- Creating equal fractions ($\frac{3}{4} = \frac{3 \times 2}{4 \times 2} = \frac{6}{8}$)
- Adding and subtracting fractions with the same denominator
- Building fractions from smaller fractions ($\frac{3}{8} = \frac{1}{8} + \frac{1}{8} + \frac{1}{8}$)
- Connecting addition and subtraction of whole numbers to multiplying fractions by whole numbers
- Connecting addition of fractions to the concept of angle measurement
- Representing and interpreting data
- Converting fractions with denominators of 10 or 100 into decimals
- Locating decimals on a number line
- Comparing decimals and fractions using the symbols $>$ (more than), $=$ (equal to), and $<$ (less than)

5th grade

In Grade 5, instructional time will focus on three critical areas: (1) developing fluency with addition and subtraction of fractions, and developing understanding of the multiplication of fractions and of division of fractions in limited cases (unit fractions divided by whole numbers and whole numbers divided by unit fractions); (2) extending division to 2-digit divisors, integrating decimal fractions into the place value system and developing understanding of operations with decimals to hundredths, and developing fluency with whole number and decimal operations; and (3) developing understanding of volume.

In grade five, students will build their understanding of the place value system by working with decimals up to the hundredths place. Students will also add, subtract, and multiply fractions, including fractions with unlike denominators. They will continue to expand their geometry and measurement skills, learning the concept of volume and measuring the volume of a solid figure.

Activities in these areas will include:

- Quickly and accurately multiplying multi-digit whole numbers
- Dividing numbers with up to four digits by two-digit numbers
- Using exponents to express powers of 10 (in 10^2 , 2 is the exponent)
- Reading, writing, and comparing decimals to the thousandths place

- Adding, subtracting, multiplying, and dividing decimals to the hundredths place
- Writing and interpreting mathematical expressions using symbols such as parentheses. For example, “add 8 and 7, then multiply by 2” can be written as $2 \times (8+7)$.
- Adding and subtracting fractions with unlike denominators (bottom numbers) by converting them to fractions with matching denominators
- Multiplying fractions by whole numbers and other fractions
- Dividing fractions by whole numbers and whole numbers by fractions
- Analyzing and determining relationships between numerical patterns
- Measuring volume using multiplication and addition

Mathematics

6th – 8th grade

Domain Progressions

6	7	8
Ratios and Proportional Relationships		
The Number System		
Expressions and Equations		
		Functions
Geometry		
Statistics and Probability		

6th grade

In Grade 6, instructional time will focus on four critical areas: (1) connecting ratio and rate to whole number multiplication and division and using concepts of ratio and rate to solve problems; (2) completing understanding of division of fractions and extending the notion of number to the system of rational numbers, which includes negative numbers; (3) writing, interpreting, and using expressions and equations; and (4) developing understanding of statistical thinking.

In grade six, your child will learn the concept of rates and ratios and use these tools to solve word problems. Students will work on quickly and accurately dividing multi-digit whole numbers and adding, subtracting, multiplying, and dividing multi-digit decimals. Students will extend their previous work with fractions and decimals to understand the concept of rational numbers—any number that can be made by dividing one integer by another, such as $\frac{1}{2}$, 0.75, or 2. Students will also learn how to write and solve equations—mathematical statements using symbols, such as $20+x = 35$ —and apply these skills in solving multi-step word problems.

Activities in these areas will include:

- Understanding and applying the concepts of ratios and unit rates, and using the correct language to describe them (for example, the ratio of wings to beaks in a flock of birds is 2 to 1, because for every 2 wings there is 1 beak)
- Building on knowledge of multiplication and division to divide fractions by fractions
- Understanding that positive and negative numbers are located on opposite sides of 0 on a number line
- Using pairs of numbers, including negative numbers, as coordinates for locating or placing a point on a graph
- Writing and determining the value of expressions with whole-number exponents (such as $15+32$)
- Identifying and writing equivalent mathematical expressions by applying the properties of operations. For example, recognizing that $2(3+x)$ is the same as $6+2x$
- Understanding that solving an equation such as $2+x = 12$ means answering the question, "What number does x have to be to make this statement true?"
- Representing and analyzing the relationships between independent and dependent variables
- Solving problems involving area and volume

7th grade

In Grade 7, instructional time will focus on four critical areas: (1) developing understanding of and applying proportional relationships; (2) developing understanding of operations with rational numbers and working with expressions and linear equations; (3) solving problems involving scale drawings and informal geometric constructions, and working with two- and three-dimensional shapes to solve problems involving area, surface area, and volume; and (4) drawing inferences about populations based on samples.

In grade seven, students will further develop their understanding of rates and ratios, using tables, graphs, and equations to solve real-world problems involving proportional relationships. Students will also work on quickly and accurately solving multi-step problems involving positive and negative rational numbers.

Additionally, students will expand their knowledge of geometry and apply the properties of operations to solve real world problems involving the measurement of multi-dimensional objects.

Activities in these areas will include:

- Determining whether two quantities are in a proportional relationship and using knowledge of rates, ratios, proportions, and percentages to solve multi-step problems
- Identifying the unit rate of change (the constant rate at which the value of a variable changes) in tables, graphs, equations, and verbal descriptions
- Calculating the unit rates associated with ratios of fractions, including quantities measured in different units (for example, the ratio of $\frac{1}{2}$ a mile for every $\frac{1}{4}$ of an hour means that you travel 2 miles in an hour)
- Solving problems using equations to find the value of one missing variable
- Applying the properties of operations to generate equivalent mathematical expressions
- Solving multi-step word problems by adding, subtracting, multiplying, and dividing positive and negative rational numbers in any form (including whole numbers, fractions, or decimals)
- Understanding that numbers cannot be divided by 0
- Converting rational numbers to decimals using long division
- Describing situations in which positive and negative quantities combine to make 0
- Finding the area of two-dimensional objects and the volume and surface area of three-dimensional objects

8th grade

In Grade 8, instructional time will focus on three critical areas: (1) formulating and reasoning about expressions and equations, including modeling an association in bivariate data with a linear equation, and solving linear equations and systems of linear equations; (2) grasping the concept of a function and using functions to describe quantitative relationships; (3) analyzing two- and three-dimensional space and figures using distance, angle, similarity, and congruence, and understanding and applying the Pythagorean Theorem.

Students take their understanding of unit rates and proportional relationships to a new level, connecting these concepts to points on a line and ultimately using them to solve linear equations that require them to apply algebraic reasoning as well as knowledge of the properties of operations.

Students will also expand their understanding of numbers beyond rational numbers to include numbers that are irrational— meaning that they cannot be written as a simple fraction.

Activities in these areas will include:

- Understanding that every rational number (such as $\frac{1}{2}$, 0.3, 2, or -2) can be written as a decimal, but that the decimal form of an irrational number is both non-repeating and infinite
- Applying the properties of exponents to generate equivalent numerical expressions
- Determining the value of square roots of small perfect squares and cube roots of small perfect cubes
- Graphing proportional relationships and interpreting the unit rate as the slope (how steep or flat a line is)
- Solving and graphing one- and two-variable linear equations
- Understanding that a function is a rule that assigns to each value of x exactly one value of y , such as $y=2x$, a rule that would yield such ordered pairs as $(-2,-4)$, $(3,6)$, and $(4,8)$
- Comparing the properties of two functions represented in different ways (in a table, graph, equation, or description)
- Determining congruence (when shapes are of equal size and shape) and similarity (same shape but different sizes)
- Learning and applying the Pythagorean Theorem (an equation relating the lengths of the sides of a right triangle)
- Solving problems involving the volume of cylinders, cones, and spheres

Science

Kindergarten – 5th grade

Science instruction involve students actively using scientific processes to understand course content and make connections to real life and related areas of study. The Arizona Science Standards present a vision of what it means to be scientifically literate, and college and career ready. These standards outline what all students need to know, understand, and be able to do by the end of high school and reflect the following shifts for science education:

- Organize standards around thirteen core ideas and develop learning progressions to coherently and logically build scientific literacy from kindergarten through high school.
- Connect **core ideas**, **crosscutting concepts**, and **science and engineering practices**, to make sense of the natural world and understand how science and engineering are practiced and experienced.
- Focus on fewer, broader standards that allow for greater depth, more connections, deeper understanding, and more applications of content.

To view the AZ Science standards, <https://www.azed.gov/standards-practices/k-12standards/standards-science/>

Arizona State Science Standards
Distribution of Core Ideas in Know Science across Grade Levels

Knowing Science	Knowing Science	K	1	2	3	4	5	6	7	8	HS
P1 Physical Science	All matter in the Universe is made of very small particles.										
P2: Physical Science	Objects can affect other objects at a distance.										
P3: Physical Science	Changing the movement of an object requires a net force to be acting on it.										
P4: Physical Science	The total amount of energy in a closed system is always the same but can be transferred from one energy store to another during an event.										

Knowing Science	Knowing Science	K	1	2	3	4	5	6	7	8	HS
E1 Earth & Space Science	The composition of the Earth and its atmosphere and the natural and human processes occurring within them shape the Earth's surface and its climate.										
E2: Earth & Space Science	The Earth and our solar system are a very small part of one of many galaxies within the Universe.										

Knowing Science	Knowing Science	K	1	2	3	4	5	6	7	8	HS
L1 Life Science	Organisms are organized on a cellular basis and have a finite life span.										
L2: Life Science	Organisms require a supply of energy and materials for which they often depend on, or compete with, other organisms.										
L3: Life Science	Genetic information is passed down from one generation of organisms to another.										
L4: Life Science	The unity and diversity of organisms, living and extinct, is the result of evolution.										

Kindergarten

In kindergarten, students will learn to observe objects using the different senses and ask questions about their observations. They will explore and participate in guided investigations and discovery-based projects. Students will apply concepts learning in reading and math to organize data based on similar and different characteristics and communicate their findings. Using tools responsibly and safely is also discussed.

Activities in these areas will include:

- Observe common objects using multiple sense.
- Ask questions based on experiences with objects, organisms, and events in the environment.
- Demonstrate safe behavior and appropriate procedures
- Perform simple measurements using non-standard units of measure to collect data.
- Organize, compare, classify, and sequence objects, organisms, and event according to various characteristics.
- Communicate observations with diagrams, pictures, charts, and words.

- Give examples of how people use science in their everyday lives.
- Identify how diverse people/cultures have contributed to the field of science.
- Distinguish between living and nonliving things.
- Know the names of body parts and the senses.
- Understand the relationship between organisms and their environment.
- Investigate different forms of energy, spatial relationships, and the way objects move.

1st grade

In first grade, students will build upon the skills and knowledge they acquired in Kindergarten. Many of the concepts are similar, but on a more complex level to encourage discovery and exploration on deeper levels.

Activities in these areas will include:

- Demonstrate safe behavior and appropriate procedures
- Record data from guided investigations in an organized and appropriate format
- Compare the results of the investigation to predictions made prior to the investigation.
- Communicate the results of an investigation using pictures, graphs, models, and/or words.
- Identify various technologies (e.g., automobiles, radios, refrigerators) that people use.
- Describe how suitable tools help make better observations and measurements.
- Identify the characteristics of living things, including growth and development, reproduction, and response to stimulus.
- Identify observable similarities and differences between/among different groups of animals.
- Identify stages of human life from infancy to adulthood.
- Compare the habitats (e.g., desert, forest, prairie, water, underground) in which plants and animals live.
- Classify objects by observable properties (shape, texture, size, color, weight...)
- Understand the Earth and our Environment.

2nd grade

In second grade, students will participate in planning and conducting investigations. Students will explore the relationship between curiosity and discovery as they learn to formulate questions from observation and experiences.

Students will apply concepts learning in reading and math to organize data based on similar and different characteristics and communicate their findings. Using tools responsibly and safely is also discussed.

Activities in these areas will include:

- Predict the results of an investigation.
- Construct reasonable explanations of observations on the basis of data obtained (e.g., Based on the data, does this make sense? Could this really happen?).
- Generate questions for possible future investigations based on the conclusions of the investigation.
- Identify parts of a system too small to be seen (e.g., plant and animal cells).
- Analyze how various technologies impact aspects of people's lives (e.g., entertainment, medicine, transportation, communication).
- Identify a simple problem that could be solved by using a suitable tool.
- Describe the basic functions of the digestive, respiratory, and circulatory system.
- Describe the life cycle of various insects, mammals, and organisms.
- Classify objects and materials in terms of measurable properties using scientific tools.
- Demonstrate the water cycle and that water can be found in the form of a gas, liquid, and solid.

3rd grade

In third grade, students will build upon the skills and knowledge they have already acquired. Many of the concepts are similar, but on a more complex level to encourage discovery and exploration on deeper levels. Students will begin to formulate questions and recognize the value in asking questions as a problem-solving strategy. The students will incorporate more and more concepts from reading and math with more of an emphasis on math as the two subjects begin to align.

Activities in these areas will include:

- Formulate relevant questions about the properties of objects, organisms, and events of the environment using observations and prior knowledge.
- Predict the results of an investigation based on observed patterns.
- Plan a simple investigation.
- Use metric and U.S. customary units to measure objects.
- Organize data using the different methods (bar graphs, pictographs, and tally charts).
- Construct reasonable interpretations of the collected data based on questions.
- Communicate investigations and explanations using evidence and appropriate terminology.
- Describe an investigation in ways that enable others to repeat it.
- Understand changes in Environments

- Identify the ways we use tools and technology and how that has impacted our culture.

4th grade

In fourth grade, students will participate in planning and conducting investigations with an emphasis on recording the data. Students will explore the relationship between curiosity and discovery as they learn to formulate questions from observation and experiences. They will begin to understand the difference between a fun experiment and a scientific experiment that can be repeated to prove a theory.

Students will apply concepts learned in reading and math to organize data based on similar and different characteristics and communicate their findings. Using tools responsibly and safely is also discussed.

Activities in these areas will include:

- Locate information (e.g., book, article, website) related to an investigation
- Conduct controlled investigations (e.g., related to erosion, plant life cycles, weather, magnetism) in life, physical, and Earth and space sciences.
- Communicate with other groups or individuals to compare the results of a common investigation.
- Explain various ways scientists generate ideas.
- Describe how natural events and human activities have positive and negative impacts on environments.
- Compare structures in plants and animals that serve different functions in growth and survival.
- Differentiate renewable resources from nonrenewable resources.
- Recognize the characteristics that make an animal successful in its environment.

5th grade

In fifth grade, students will build upon the skills and knowledge they have already acquired. Many of the concepts are similar, but on a more complex level to encourage discover and exploration on deeper levels. Students will begin to formulate questions and recognize the value in asking questions as a problem-solving strategy. The students will incorporate more and more concepts from reading and math with more of an emphasis on math as the two subjects begin to align.

Activities in these areas will include:

- Conduct simple investigations
- Analyze data obtained in a scientific investigation to identify trends and form conclusions.

- Identify possible relationships between variables in simple investigations (e.g., time and distance; incline and mass of object).
- Provide examples that support the premise that science is an ongoing process that changes in response to new information and discoveries.
- Describe qualities of the scientists' habits of mind (e.g., openness, skepticism, integrity, tolerance).
- Propose a solution, resource, or product that addresses a specific human, animal, or habitat need.
- Identify the relationship between structures and functions of organisms.
- Understand the physical and chemical properties of matter

Science

6th – 8th grade

Science instruction involve students actively using scientific processes to understand course content and make connections to real life and related areas of study. The Arizona Science Standards present a vision of what it means to be scientifically literate, and college and career ready. These standards outline what all students need to know, understand, and be able to do by the end of high school and reflect the following shifts for science education:

- Organize standards around thirteen core ideas and develop learning progressions to coherently and logically build scientific literacy from kindergarten through high school.
- Connect **core ideas**, **crosscutting concepts**, and **science and engineering practices**, to make sense of the natural world and understand how science and engineering are practiced and experienced.
- Focus on fewer, broader standards that allow for greater depth, more connections, deeper understanding, and more applications of content.

L2: Life Science	Organisms require a supply of energy and materials for which they often depend on, or compete with, other organisms.										
L3: Life Science	Genetic information is passed down from one generation of organisms to another.										
L4: Life Science	The unity and diversity of organisms, living and extinct, is the result of evolution.										

6th grade

In sixth grade, students will be able to differentiate between questions, predictions, and hypothesis. They will begin to see the relationship between science, reading, and math as they research, and collect and organize data. Students will begin to use varied forms of data collection, so they are better able to analyze the results and draw conclusions from their investigations. The systematic approach of the scientific method lends itself to complex problem-solving skills, and the writing process for its thorough and structured approach.

Activities in these areas will include:

- Locate research information, not limited to a single source, for use in the design of a controlled investigation.
- Conduct a controlled investigation using scientific processes.
- Keep a record of observations, notes, sketches, questions, and ideas using tools such as written and/or computer logs.
- Communicate the results of an investigation with appropriate use of qualitative and quantitative information
- Create a list of instructions that others can follow in carrying out a procedure (without the use of personal pronouns).

- Describe how a major milestone in science or technology has revolutionized the thinking of the time (e.g., Cell Theory, sonar, SCUBA, underwater robotics).
- Apply the following scientific processes to other problem solving or decision-making situations.
- Evaluate the interactions between human populations, natural hazards, and the environment.
- Analyze the relationships among various organisms and their environment.

7th grade

In seventh grade, students will build upon the skills and knowledge they have already acquired.

The students will incorporate more and more concepts from reading and math with more of an emphasis on math as the two subjects begin to align. Math is no longer is a component of science that helps with the collection of data, but because a scientific tool that can be utilized to analyze the data and ensure accurate results.

Science requires a lot of research, vocabulary, and writing of notes, reports, data analysis, and reports. There is an emphasis on writing with proper conventions, structure and organization, and editing skills.

Activities in these areas will include:

- Write clear, step-by-step instructions for following procedures (without the use of personal pronouns).
- Conduct a controlled investigation, utilizing multiple trials, to test a hypothesis using scientific processes.
- Analyze environmental benefits of the following human interactions with biological or geological systems.
- How organisms obtain and use resources to develop and thrive
- Analyze the interactions of living organisms with their ecosystems
- Describe the composition and interactions between the structure of the Earth and its atmosphere.
- Understand the processes acting on the Earth and their interaction with the Earth systems.
- Understand the relationships of the Earth and other objects in the solar system.

8th grade

In eighth grade, students will build upon the skills and knowledge they have already acquired. Many of the concepts are similar, but on a more complex level to encourage discover and exploration on deeper levels.

The students will begin to formulate questions and recognize the value in asking questions as a problem-solving strategy. The students will incorporate more and more concepts from reading and math with more of an emphasis on math as the two subjects begin to align.

Math is no longer is a component of science that helps with the collection of data, but because a scientific tool that can be utilized to analyze the data and ensure accurate results.

Science requires a lot of research, vocabulary, and writing of notes, reports, data analysis, and reports. There is an emphasis on writing with proper conventions, structure and organization, and editing skills.

Activities in these areas will include:

- Formulate predictions, questions, or hypotheses based on observations. Locate appropriate resources.
- Design and conduct controlled investigations.
- Communicate results of investigations.
- Analyze and interpret data to explain correlations and results; formulate new questions.
- Develop viable solutions to a need or problem.
- Describe the interactions between human populations, natural hazards, and the environment.
- Understand how science is a process for generating knowledge.
- Identify individual, cultural, and technological contributions to scientific knowledge.
- Understand the basic principles of heredity.
- Identify structural and behavioral adaptations.
- Understand physical and chemical properties of matter.
- Understand the relationship between force and motion.

Social Studies

Kindergarten-5th grade

Social Studies follows the C3 Framework to prepare students for college, career, and civic life. Students are given genuine opportunities to think critically, research topics, develop informed opinions, and to express their ideas through speaking and writing through the examination of four core disciplines: history, geography, economics, and civics.

The C3 is driven by the following shared principles about high quality social studies education:

- Social studies prepares the nation's young people for college, careers, and civic life.
- Inquiry is at the heart of social studies.
- Social studies involves interdisciplinary applications and welcomes integration of the arts and humanities.
- Social studies is composed of deep and enduring understandings, concepts, and skills from the disciplines. Social studies emphasizes skills and practices as preparation for democratic decision-making.
- Social studies education should have direct and explicit connections to the Common Core State Standards for English Language Arts.

To view the K-5 Social studies standards, <https://www.azed.gov/standards-practices/k-12standards/standards-social-studies/>

Kindergarten: Children as Citizens

Through an introduction to civics, geography, economics, and history, Kindergarten students will understand their roles and responsibilities as citizens within their own context. Students will also learn about their own culture and

how it impacts understanding of oneself and others as well as be introduced to aspects of our National culture.

- Importance of rules and responsibilities
- Individual roles in a community
- Personal decision-making
- Familiarity with geographic models
- Culture in the home, school, and community
- American symbols, holidays, and traditions

1st Grade: Communities: Living and Working Together

Through the study of civics, geography, economics, and history, first grade students will understand how a community functions and how each member contributes to the community for the common good. Students will study their local community and learn about characteristics that define urban, suburban, and rural communities. Democratic principles and participation in government are introduced. Community resources, environment, change over time, and cause/effect are examined.

- Understanding perspectives of others
- Effects of human movement
- School and community functions of government
- Cooperation and compromise
- Earning, spending, and saving money
- American symbols and traditions
- Using geographic models

2nd Grade: The World Around Me

Through the study of geography and economics, the students' lenses expand to learn how their world is interconnected globally. Students will develop a spatial understanding of the world around them so they can understand how other cultures and civilizations are interconnected and have influenced who we are as a community, state, and nation.

- Working together to solve problems
- Influence of weather and climate
- Individual and leadership roles
- Development and change of civilizations and cultures
- Identifying regions using geographic models
- Societal institutions and their belief systems
- Earning, spending, and saving money in a global community

3rd Grade: Arizona Studies (prehistoric to present day)

Third grade students will study Arizona with an integrated approach considering the following factors:

- The contributions of various cultural and ethnic groups including the 22 Indian Nations that reside in Arizona

- Economic, political, and geographic elements
- Structure of the state and local governments
- Roles and responsibilities as citizens of Arizona
- Examination of primary and secondary sources including written and oral histories, images, current events, and artifacts
- Disciplinary skills and processes including change and continuity over time, multiple perspectives, using and understanding sources, and cause and effect

4th Grade: Regions and Cultures in America

In the fourth grade, Students will study Arizona with an integrated approach considering the following factors:

- The contributions of various cultural and ethnic groups including the 22 Indian Nations that reside in Arizona
- Economic, political, and geographic elements
- Structure of the state and local governments
- Roles and responsibilities as citizens of Arizona
- Examination of primary and secondary sources including written and oral histories, images, current events, and artifacts
- Disciplinary skills and processes including change and continuity over time, multiple perspectives, using and understanding sources, and cause and effect

5th Grade: United States Studies (American Revolution to Industrialism)

In fifth grade, Students understand the history of the United States within an integrated approach considering the following factors:

- Historic and economic events from American Revolution to Industrialism including but not limited to the American Revolution, Constitutional Convention, westward expansion, Civil War and Reconstruction, and growth of industrial and urban America looking at origins, founders, and key political, economic, and social figures as they relate to the events outlined above such as technological developments, urbanization, territorial expansion, industrialization, political parties, and universal suffrage
- Creation of the Constitution and the principles within the document including historical and philosophical influences, influence of state constitutions, Articles of Confederation, compromises and ratification debates at the Constitutional Convention, Bill of Rights, limited government, popular sovereignty, federalism, rule of law, checks and balances, and separation of powers
- Development and structure of the national government including the Preamble, the three branches, examples of powers granted to each

branch, powers granted to the states and individuals, the Bill of Rights, and current issues in regard to federalism and rights

- Influence of immigration including push/pull factors, industrialization, urbanization, diversification of the population, and debates over immigration
- Contributions of various cultural and ethnic groups to the changing social and political structure of the United States
- Roles and responsibilities as citizens of the United States including participation in the political system
- Examination of primary and secondary sources including written and oral histories, images, and artifacts with special attention being given to founding documents including the Declaration of Independence, the Constitution and amendments, and landmark Supreme Court cases
- Inclusion of historical fiction, images, books, graphic novels, in addition to informational texts
- Disciplinary skills and processes including change and continuity over time, multiple perspectives, using and understanding sources, and cause and effect

Social Studies

6th – 8th grade

Social Studies follows the C3 Framework to prepare students for college, career, and civic life. Students are given genuine opportunities to think critically, research topics, develop informed opinions, and to express their ideas through speaking and writing through the examination of four core disciplines: history, geography, economics, and civics.

The C3 is driven by the following shared principles about high quality social studies education:

- Social studies prepares the nation's young people for college, careers, and civic life.
- Inquiry is at the heart of social studies.
- Social studies involves interdisciplinary applications and welcomes integration of the arts and humanities.
- Social studies is composed of deep and enduring understandings, concepts, and skills from the disciplines. Social studies emphasizes skills and practices as preparation for democratic decision-making.
- Social studies education should have direct and explicit connections to the Common Core State Standards for English Language Arts.

To view the 6-8 Social studies standards, <https://www.azed.gov/standards-practices/k-12standards/standards-social-studies/>

6th Grade: Global Studies World Religions and Cultures of the Eastern Hemisphere

Sixth grade students will understand the cultural, religious, economic, and political systems of selected societies in the Eastern Hemisphere. Regions in the Eastern Hemisphere include the Middle East and North Africa, sub-Saharan Africa, Europe, Asia (east, south, and southeast), and Oceania.

- Beginnings of human society such as early hominid development, peopling of the earth, and the Neolithic Revolution
- Early river civilizations such as Mesopotamia, the Nile River Valley, the Indus River Valley, and the Yellow River Valley
- World religions including, but not limited to Buddhism, Christianity, Confucianism, Hinduism, Islam, Judaism, Shintoism, Sikhism, and Taoism, (origins, founders, major tenets, practices, and sacred writings)
- Classical civilizations such as Greek, Roman, Persian, and Chinese (political, social, religious, and economic systems)
- Rise and fall of empires and the impacts to the region
- Growth of trade networks across the Eastern Hemisphere and impacts such as cultural exchange and diffusion, inventions, ideas, diseases, and languages
- Development of feudal systems in medieval Europe and Japan
- Different civilizations in the Eastern Hemisphere during the Middle Ages with regards to political, social, religious, and economic systems • Origins, accomplishments, and geographic diffusion of the Renaissance and the Reformation • Ancient and modern geography of the Eastern Hemisphere • Examination of primary and secondary sources including written and oral histories, images, and artifacts • Disciplinary skills and processes including change and continuity over time, multiple perspectives, using and understanding sources, and cause and effect

7th Grade: Integrated Global Studies

Seventh grade students will understand the relationships and interactions

- between societies and cultures in both the Eastern and Western Hemispheres. Influence of the Scientific Revolution on innovation and the Enlightenment on the concept of rights
- Revolutions around the world such as the American Revolution, French Revolution, Russian Revolution, the Cultural Revolution (Mao Zedong), and Latin American Revolutions
- Global imperialism and its lasting consequences on regional conflict, stability, indigenous peoples, human movement, including slavery and involuntary migrations
- Impact of industrialization and the rise of organized labor
- Global depressions
- World War I and World War II including the time period between the wars with the rise of fascism
- Cold War including origins, nuclear deterrence, and outcome

- Global conflicts and their consequences such as the Korean War, Vietnam War, Arab-Israeli Conflict, and Gulf War
- Government and economic systems such as monarchy, dictatorship, theocracy, oligarchy, aristocracy, democracy, constitutional republic, anarchy, and capitalism, socialism, and communism including founders, major tenets, practices, and writings
- Examination of primary and secondary sources including written and oral histories, images, and artifacts
- Disciplinary skills and processes including change and continuity over time, multiple perspectives, using and understanding sources, and cause and effect

8st Grade: Citizenship and Civic Engagement in Today's Society

In eighth grade, students will make connections between historical and current/recent issues as a base for implementing change in society. Students will recognize and practice their roles and responsibilities as both American and global citizens. United States History will focus on the major events that have their roots in the Constitution, Bill of Rights, and subsequent amendments.

- Foundations of the United States government stemming from historical events such as the American Revolution and Civil War
- Constitution including structure, function, and principles
- Formal institutions such as Congress, the courts, the presidency, and linkage institutions such as media, elections, interest groups, polling, and political parties
- Historical and current legislation and landmark Supreme Court cases
- Civil rights movements throughout American history such as African Americans, Latinx, Asian-Americans, women, American Indians, LGBTQ individuals, persons with disabilities, youth, and the elderly
- Immigration
- Amendments to the Constitution that have expanded the right to vote and equal protection under the law
- Social movements and issues both historical and current including the constitutional principles and structures (amendments, courts, Congress, and executive orders) that spur, promote, and protect these movements
- Human rights and genocides including treaties and organizations that promote human rights and a study of the nations and leaders that abuse human rights and/or support genocide (In addition to the study of the Holocaust, other genocides should be studied.)
- Environmental issues
- Information and media age including digital citizenship and media literacy
- Terrorism both domestic and international and how it influences citizens' safety and rights

- Examination of primary and secondary sources including written and oral histories, images, and artifacts
- Disciplinary skills and processes including change and continuity over time, multiple perspectives, using and understanding sources, and cause and effect

Arts & Athletics

Kindergarten – 8th grade

The Arts and Athletics program is an important part of the Skyline Education mission. These programs offer an integrated performance and visual arts education, aligned to the Arizona State Grade Articulated and National Standards, as well as the National Standards for Arts Education.

Skyline Education also offers a comprehensive athletic program that establishes a strong relationship between success on and off the court or playing field.

In the Arts, the courses offered range within the disciplines of Performing and Visual Arts. Students in grades K-8 experience and create as they progress through the programs of dance (ballet, jazz, modern, hip-hop and lyrical dance), theater, music, multi-medium and multi-dimensional art, photography, graphics, and beyond. Students create, relate and evaluate from beginning through advanced levels by practical, written, and performance-based assessment.

The Athletic program utilizes the Arizona State Standards for Physical Education and the seasonal sports schedule to establish a development and dynamic physical education program that includes competitive sports.

Arts and Athletics are programs that are integrated into the daily schedule. Years of research shows that Arts and Athletics are closely linked to almost everything that we as a nation say we want for our children and demand from our schools: academic achievement, social and emotional development, civic engagement, and equitable opportunity ([Smith, Edutopia.org](http://Smith.Edutopia.org)).

*Availability of some of these classes may vary between schools.

*Performing Arts, Storytelling, and Theatrical performances are embedded in the Social Studies and Language Arts content areas.

K-8 Courses

Athletics

K-2 Physical Education – Athletic Fundamentals (Full year)

This course offers students a foundation in physical education and kinesthetic. Topics include safety, stretching, increasing endurance, developing leadership qualities, building self-esteem, working as a team, and having fun. The students will explore a variety of team sports with an emphasis on promoting and encouraging a lifetime of participating in physical fitness.

**Opportunities to participate in sports through USAL.*

3-8 Physical Education – Athletic Development (Full year)

This course offers students an opportunity to develop specific skills that will enhance participation in sports. Topics include safety, strength conditioning, building up speed and stamina, developing leadership qualities, building self-esteem, working as a team, and having fun.

The students will explore a variety of sports with an emphasis on promoting and encouraging a lifetime of participating in physical fitness.

**Opportunities to participate in competitive sports is based on interest.*

Arts

Visual Art

This course offers an opportunity for students to learn about the world in a different way than other academic disciplines. Students will have hands on experience creating art with a variety of media such as drawing, painting, clay, and other 3-D materials. Through these projects this course will incorporate Art History, learning about other cultures, social topics, as well as a sense of identity and self-expression. Students will learn presentation skills as well as responding to their own and others' artwork.

Performing Arts

Creative Movement (Full Year)

This course is an introduction to the basic concepts of rhythm and movement using creative games that expand their individual creativity. The students will learn spatial awareness, listening skills, group socialization and structure.

The students will strengthen their bodies and learn coordination to ready themselves for the next level in dance. Our goal is to make sure we are building the love of dance in each child, nurturing their natural creativity in a fun and loving atmosphere. Additionally, our goal is

to awaken interest, enthusiasm and self-confidence through dance.

Dance Foundations (Full Year)

This is an intro level dance class designed for students who have very limited or no dance experience. This class will teach hip-hop, lyrical, military, and modern dance steps. Students are expected to dress out in appropriate dance attire for this class. Students will perform dance routines at assemblies.

Music

K-6 Music

In this course students develop skills in 5 content areas; melody, rhythm, reading and writing, part work and form. Each child will develop his singing voice.

K- 1st Graders Choir (Full Year)

In this course students learn steady beat, simple rhythm and melody through song and body percussion. Choir students perform at assemblies and production throughout the year.

2nd Graders Orff Instruments (Full Year)

This course further enhances our student's music understanding by allowing them to apply steady beat, simple rhythm and melodic lines with the use of Orff instruments, hand drums and other rhythm instruments. Singing is also a part of this course. These students also perform throughout the year.

3rd Graders Recorders (Full Year)

In this course students learn how to play the recorder as well as learn to read notes and basic rhythms. Because of hygiene safety each student needs to have their own instrument which will be available for purchase through the school. Performances are required throughout the school year for various assemblies and productions.

4th – 8th Graders String Ensemble (Full Year)

In this course students will have the opportunity to learn to play a string instrument. They will be able to choose **violin, viola, cello or bass**. For this class students will need to rent an appropriately sized instrument (which the teacher recommends), an Essential Elements book 1 for the instrument, shoulder rest or cello stop. These items are available at nearby music stores. Students do not need to have a knowledge of music or how to play the instrument already. Fundamentals of string playing, and music skills are taught in this class. Students perform many times throughout the school year.

Intermediate: (Audition only)

This class builds upon the knowledge mastered in the beginning class. For this class students will need to rent an appropriately sized instrument (which the teacher recommends), an Essential Elements book 2 for the instrument, shoulder rest or cello stop. These items are available at nearby music stores. Students perform throughout the

school year at various assemblies and productions.

Advanced: (Audition only)

This class will be exploring string chamber music, fiddle music, and pop music as well as the fundamental techniques of playing string instruments. For this class students will need to rent an appropriately sized instrument (which the teacher recommends), an Essential Elements book 3 for the instrument, shoulder rest or cello stop. These items are available at nearby music stores. Students perform throughout the school year at various assemblies and productions.

General Elective Courses

General elective course provides an opportunity for students to enhance their education by exploring and experiencing courses that build leadership, technology, and presentation skills

*Availability of some of these classes may vary between schools

K-8 Courses

Leadership (half year)

Grades: 5th-8th

This course is designed to develop leadership, problem-solving and positive character skills for lifelong service and citizenship. Activities are based on The 7 Habits of Highly Effective People, social/emotional competencies, and college and career plans.

Publications (half year)

Students in the publications class learn copywriting, photographic layout, and design skills involved in the production of different forms of publications.

Robotics (half year)

This course will follow basic principles of the curriculum from the FIRST LEGO League (FLL) program, which exposes students to science, technology, engineering and math. This program encourages imaginative and creative thinking and innovation.

Students will problem solve, research, and use critical thinking as essential components of these subjects. FLL introduces students to engineering challenges based on real-world scenarios by building LEGO-based robots to complete specific tasks.

There is a possibility students could compete in competitions.

K-2 Technology (half year)

K-2 Technology is an introduction to the fundamentals of how to use personal computers and includes the AZ Educational Technology Standards. The primary focus is beginning keyboarding skills with a goal of touch-typing, word processing skills, internet safety and "netiquette" will be discussed.

3-5 Technology (half year) (0.5 credit)

Grades: 3rd-5th grade

This program series is an introduction to the basics of coding, technology and design using Java, Game Design and/or Minecraft.

Internet safety and "netiquette" will be discussed.

Technology 1 (half year)

Grades : 6th – 8th grade

Microsoft Word processing.

This course will use word processing software to create, name and manage files, edit and format different texts, and apply themes.

Technology II (half year)

Grades : 6th – 8th grade

Microsoft- Desktop Presentation PowerPoint

Use of PowerPoint to produce quality presentation visuals with animation and sound.

Technology III (half year)

Grades : 6th – 8th grade

Microsoft Publisher

Introduction to publishing and design. Students will learn to create publications using a template or from scratch, use building blocks such as Page Parts to create pages, use the Backstage View to manage information about files, add text and images to a publication, and create a layout.

Technology IV (half year)

Grades: 6th – 8th grade

Microsoft Access- Database Management

SIX PILLARS OF CHARACTERS

CHARACTER	COLOR	DESCRIPTION
TRUSTWORTHINESS	Blue: Think True Blue	<ul style="list-style-type: none"> • Be honest • Don't deceive, cheat or steal • Be reliable—do what you say you'll do • Have the courage to do the right thing • Build a good reputation • Be loyal—stand by your family, friends and country
RESPECT	Yellow/Gold: Think the Golden Rule	<ul style="list-style-type: none"> • Treat others with respect; follow the Golden Rule • Be tolerant of differences • Use good manners, not bad language • Be considerate of the feelings of others • Don't threaten, hit or hurt anyone • Deal peacefully with anger, insults and disagreements
RESPONSIBILITY	Green: Think being responsible for a garden of finances; or as in being solid and reliable like an oak	<ul style="list-style-type: none"> • Do what you are supposed to do • Persevere: keep on trying! • Always do your best • Use self-control • Be self-disciplined • Think before you act—consider the consequences • Be accountable for your choices
FAIRNESS	Orange : Think of dividing an orange into equal sections to share fairly with friends	<ul style="list-style-type: none"> • Play by the rules • Take turns and share • Be open-minded; listen to others • Don't blame others carelessly
CARING	Red : Think of a heart	<ul style="list-style-type: none"> • Be kind • Be compassionate and show you care • Express gratitude • Forgive others • Help people in need
CITIZENSHIP	Purple : Think regal purple as representing the state	<ul style="list-style-type: none"> • Do your share to make your school and community better • Cooperate • Get involved in community affairs • Stay informed; vote • Be a good neighbor • Obey laws and rules • Respect authorities • Protect the environment
